Letter from our President, Daniel St.Pierre

Dear Internet Entrepreneur,

It is a fact anyone with half a brain can make money online, as long as you follow a simple, idiot proof plan which we designed according to proven internet marketing strategies used by small, medium and large companies doing business online.

I am absolutely convinced that, if you follow my simple ebusiness plan you will generate revenue in direct proportion with your efforts. In the event you already have a website the same guarantee applies: Make more money using our proprietary resources or get a full, no questions asked refund.

Before we begin I want to share a personal story with you...

I bought a brand new laptop on my birthday in 2007 for under \$500. A friend of mine bought the same Compaq laptop one week later. Both our computers were loaded with essentially the same software. Both have been connected to high speed internet since.

Why then has my laptop generated over \$45,000.00 in revenue EACH YEAR while his has not made him a single penny? We have the same tools, the same hardware and the same software. What differs from my buddy and yours truly is I possess the desire to be successful while he embraces procrastination. He is lazy, I am driven. He is broke while I, well, am living the American dream.

Have you ever noticed it's never the hand we are dealt which dictates the outcome of a card game? Rather it's the way we play those cards... Strategy plays a key role in card games. Strategy also plays a critical role in online success.

While it is true the worst card player in the world can still win with the best hand, it is unlikely a novice will keep getting the best hand each turn. It is wise then to learn the strategy of the game and use proven techniques certain to maximize our winnings, don't you agree?

If you're still with me this means you possess at least the minimum business IQ requirement to succeed online. You are tenacious.
